

VIP2 - HYDRAULIC SCISSOR LIFTS

www.vip2.si

Are designed for fast and efficient lifting and lowering loads, reliable operation, easy maintenance.

It is intended primarily for use in storage facilities. Pier on the table serves to bridge the distance between the concrete platform and the truck bed.

Hydraulic scissor lift can be in a storage facility installed alone or in combination with other transport systems coordinated via an electric control unit.

Company VIP2 hydraulic scissor lifts are designed, manufactured, installed and maintained.

LOAD CAPACITY, SIZE, PURPOSE AND LIFTING SPEED ARE DESIGNED SPECIAL ON CUSTOMER REQUIREMENTS. (200 kg to 100 tons, size on request, purpose for technology, lifting...)

Hydraulic scissor lifts are the result of our own development and experience based mostly on customer requirements. They are made from high quality materials and components with clever solutions that provide a simple and safe operation and meet all safety regulations.

VIP2 scissor lifts are easy to maintain. All bearings are equipped with special sliding sleeves that do not require frequent maintenance. All steel parts are sandblasted and painted electrostatically, which ensures good looks and long-term corrosion protection. Installed hydraulic components with their high quality ensure long-term smooth operation. For safely work scissor lifts are equipped with various features such as security strips or curtain and protection against pipe fracture.

HIDRAVLICNE DVIŽNE MIZE

Podjetje VILPO hidravlične dvižne mize projektira, izdeluje, montira in vzdržuje. Nosilnost, velikost, višino dviganja in hitrost prilagodimo želji kupca. Zagotavljamo 12 mesečno garancijo na vse sestavne dele.

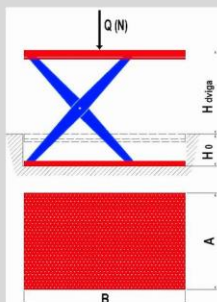

Hidravlične dvižne mize so plod lastnega razvoja in izkušenj. Izdelane so iz kvalitetnih materialov in komponent s premišljenimi rešitvami, ki zagotavljajo preprosto in varno upravljanje in izpolnjujejo vse varnostne predpise.

Da je vzdrževanje čim bolj preprosto smo vsa ležajna mesta opremili s posebnimi drsnimi pušami, ki ne zahtevajo pogostega vzdrževanja.

Vsi jekleni deli so peskani in elektrostatično barvani kar zagotavlja lep izgled in dolgotrajno protikorozijsko zaščito.

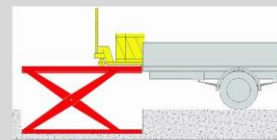

Vgrajene hidravlične komponente s svojo kvaliteto zagotavljajo dolgotrajno nemoteno delovanje.

Za varno delo so dvižne mize opremljene z različnimi elementi kot so varnostne letve ali varnostne zavese in zaščite proti cevnemu lomu.

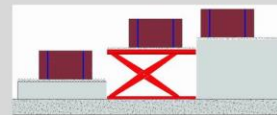

Glavne karakteristike dvižnih miz.

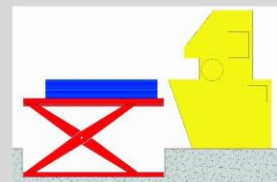

Primeri uporabe:

Dvižna miza integrirana v transportno površino.

Premoščanje višinskih razlik v tehnoloških procesih.

Strežba strojev v tehnoloških linijah.
